

Release Date: May 2009

“Trilogy Communications achieves ISO 9001:2008”

Trilogy Communications Ltd achieved ISO 9001:2000 certification in November 2007, and in April 2009 was successfully re-audited to ISO 9001:2008 standard, the newly updated edition of the internationally recognised quality management system.

ISO 9001:2008 is a global rating of quality developed by the International Organisation for Standardisation. It provides an international reference for quality management requirements as well as any regulatory obligations of the company’s industry. The stringent certification process investigates all aspects of the business to ensure that internal systems can deliver continually improving products and services.

“ISO 9001:2008 demonstrates our ongoing commitment to improvement through consistent implementation of best practice procedures across the organization,” said Mike Knight, CEO of Trilogy. “This achievement is critical because our markets view ISO 9001:2008 certification as a way of ensuring the quality and reliability of our products in the marketplace.”

BSI Management Systems was the accrediting body for this latest standard which continues a relationship which started in 2007 with the original ISO9000 audit and award.

About Trilogy

Trilogy has supplied audio communications equipment to customers in more than seventy countries since 1986. The company was originally formed to design and build video and audio infrastructure equipment for the television and radio broadcast market. It continues to serve this market but now also offers its products to a wide array of customers in defence, emergency management, training and simulation, oil and gas, gaming, and other industries.

Trilogy counts some of the world's best known names in broadcast and defence among its customer base. These include BBC, Sony, CBS, Hearst-Argyle, Radio France, Raytheon, Northrop Grumman, L3, Lockheed Martin, SAIC, BAE, Teledyne and others.

Trilogy’s Network-Centric Communications division is focused on Mercury and Mercury ES audio communications systems for use by customers who need to conduct critical communications over IP networks - most commonly in the defence, emergency management and commercial/industrial markets.

Trilogy’s Broadcast division will concentrate solely on the Broadcast sector where it has been supplying intercom, sync pulse generators and signal monitoring systems to the professional media markets since 1986.
