

Release Date: April 2009

Trilogy shows commitment to Malaysia and Indonesia

The two day event concentrated on Trilogy's flagship Mercury ES system which provides defence and intelligence functions with a high-capacity, distributed communications capability that enables multi-level and cross domain security. Unprecedented in terms of quality, sophistication and speed Mercury ES makes information sharing and decision making across organizations easier than ever.

Trilogy Communications has just held a distributor training and education seminar in Kuala Lumpur where partner companies including PT Aditech Matra, Radian Teknologi Sdn Bhd, Dagang Teknik Sdn Bhd and Pembekal Alaf Baru Sdn Bhd focussed on high-capacity, distributed, and highly secure voice communications systems for use over IP networks.

Able to count nine of the top ten worldwide defence prime contractors amongst its customers Trilogy is keen to allow the defence, emergency management and Homeland Security sectors within Malaysia and Indonesia to benefit from its proven technology.

Mercury ES operates on LANs/WANs over terrestrial or satellite-based IP networks. Users can participate in multiple communications simultaneously - including direct, conference and monitor-only. In addition, radios, telephones and other technologies can be linked to the system to provide users with a unified communications control panel.
